CONFERENCE OF AMBASSADORS - CIRCOLO DEGLI ESTERI - 8 JUNE 2023

Presentation: <https://youtu.be/gnjwCRJcKvA>

Video Conference: <https://youtu.be/fpq1QDLMSu8>

"I believe that Peace is possible even today when such ferocious aggression seems to obscure the paths of hope in Europe, even when there no longer seems to be a light that illuminates diplomacy and dialogue in the Middle East! But we must always strive to promote the culture of Solidarity and Peace especially in the new generations! Yes, peace is always possible if we live it personally and seek and prepare it together with others, before devastating weapons destroy life. Yes, we must urgently prepare the new generations to do a lot to prevent and act for peace, especially now! Arms are silent in Ukraine devastated by the violence of ideology and war without limits because it is time to find peace! The Diplomacy has the courage to define the just peace in the Middle East by recognizing the rights of all peoples and bring peace and cooperation between Israel and Palestine without leaving room for terrorist actions and war. Strong condemnation of the war in Ukraine and in the Middle East but never closing the doors to Diplomacy! Peace in Europe and in the Middle East because it is possible for men of good will who do not claim but are open to courageous dialogue without fear of risking their lives! St. Francis taught us the science and art of solidarity with silent diplomacy without clamor (the one sought by political indignation in search of ephemeral successes and solutions to one's ambitions of power)!"

Peace, Science and Art of Solidarity that begins where man and woman live together in a family, in a society and a people, in everyday work and in international dynamics! Where justice is lived not in claiming but in understanding and knowing how to serve others in politics primarily for a common good to be achieved together. The historical materialistic ideologies that have uprooted man from himself, transforming him into a "nothing" and an object to be used, those other ideologies of hedonistic and pragmatic materialism that see success and money as a sign of luck, must be unmasked by us with the truth about man, for men and women who do not disdain a freer and more democratic society! Building and preventing is what we does and promotes among our young university students!"
